

MANIFESTO

Stone is the
language of
architecture.

reimagines natural stone: we preserve its authentic texture, depth, and character—yet liberate it from weight and rigidity. Flexible stone panels, just a few millimeters thick, conform to walls, columns and facades in ways impossible for traditional stone.

*This is freedom of form without
compromising on beauty.*

ABOUT THE MATERIAL

Natural stone made flexible.

Flexible stone is a thin layer of natural stone chips and mineral pigments on an elastic backing. The material accurately replicates the pattern and texture of natural rock, yet it weighs a fraction of the amount and bends effortlessly.

Sheet thickness ranges from 0.14 to 0.35 in, with a weight of 0.92-1.84 lb/sq ft. The panels can be cut with a utility knife and installed using standard adhesive on concrete, drywall, wood, or metal. It is non-combustible and resistant to UV rays, moisture and temperature fluctuations.

0.14-0.35	0.92-1.84	22	NC/LC
in	lb/sq ft	Collections	Class

BENEFITS

Why flexible stone?

01

Lightweight

0.92-1.84 lb/sq ft - up to ten times lighter than natural stone. Places minimal load on structural elements.

02

Flexibility

Seamlessly wraps around curves, columns, and arches. Achieves shapes impossible with traditional tiles and slabs.

03

Natural Composition

Made from natural stone chips and minerals. Every sheet features a unique, authentic pattern.

04

Fire Safety

Non-combustible / low-combustibility material (NC/LC class). Suitable for evacuation routes and public spaces.

05

Weather Resistance

Withstands UV rays, moisture, and temperature fluctuations from -22 to +176 F. Suitable for both interiors and exterior facades.

06

Easy Installation

Easy to cut with a knife and install using:

- Polyurethane adhesive
- Polymer adhesive
- Acrylic adhesive
- Cement-based tile adhesive
- Liquid nails
- Mastic adhesive

APPLICATIONS

Where lives

INTERIOR

- ◆ Living rooms, bedrooms, home offices
- ◆ Kitchen backsplashes
- ◆ Bathrooms and SPAs
- ◆ Fireplaces and surrounds
- ◆ Headboards, niches, columns
- ◆ HoReCa (Hospitality), retail, offices

EXTERIOR

- ◆ Ventilated facades
- ◆ Rendered «wet» facades and plinths
- ◆ Entrance areas
- ◆ Terraces and verandas
- ◆ Landscape accents
- ◆ Facade decor

SPECIAL SOLUTIONS

- ◆ Curved (radius) surfaces
- ◆ Furniture and doors
- ◆ Art objects, reception desks
- ◆ Elevator lobbies
- ◆ Exhibition stands
- ◆ Custom formats

One material — endless possibilities.
